JASH SHAH

AI WORKFLOW AND OPERATIONS SPECIALIST

Jersey City, NJ 07306 | jashshah854@gmail.com | LinkedIn | GitHub | Portfolio | F-1 OPT

SUMMARY

AI workflow and operations specialist who translates cross-functional requirements into role-scoped workflows, structured data, validation, and clear documentation. Applies hands-on implementation across marketing, release, research, and reporting operations.

CORE SKILLS

Workflow Systems & Tools: Workflow Design, Requirements Definition, Data Modeling, QA, Release Validation, SQL, Python, JavaScript, FastAPI, React, API Integration, Supabase

Operations & Analytics: Campaign Analysis, KPI Reporting, Market Research, Audience Segmentation, Stakeholder Communication, GA4, Tableau, Excel

EXPERIENCE

Growth Marketing Analyst | **Untitled Export Management** | *New York City* **Jan 2026 - Present**

- Owned requirements, data models, integrations, release validation, and documentation for workflow changes.
- Built an internal operations platform connecting marketing, releases, A&R, project management, finance, and asset workflows through role-scoped views and recurring data syncs.
- Implemented evidence-gated campaign-health workflows that generated 20 traceable alerts with recommended next actions in a verified manual run.
- Designed a dry-run-first historical campaign-data import that normalized 7 campaigns and 88 promotional activities, reconciled $29.2K in tracked historical budget data, and surfaced source discrepancies.

Growth and Insights Strategist | **Youthvine Agency** | *New York City* **Sep 2025 - Jan 2026**

- Developed a repeatable workflow for competitor-audience research and targeted engagement, replacing about 20 hours of manual work weekly.
- Developed a five-dimension creator-scoring framework and applied it to creator evaluation and campaign planning.
- Analyzed Meta and TikTok campaign data and created research and presentation materials for targeting and performance decisions. The team recorded 25% higher targeting accuracy, 18% higher click-through rate, and 22% lower cost per result.
- Performed audience segmentation to support campaign planning across client accounts.

Marketing Associate | **Yeshaplastics** | *Mumbai, India* **Jun 2021 - Jul 2024**

- Built a QR-initiated workflow for third-party deliveries, monitoring location and traffic conditions to coordinate rest and departure timing, reduce congestion delays, and improve delivery speed.
- Conducted market research and direct outreach, building a qualified commercial pipeline that helped source over 20 clients and contributed to revenue growth.
- Supported B2B client portfolio management, contributing to 15% year-over-year portfolio growth.

PROJECTS

LaunchProof **Feb 2026 - Present**

- Local paid-media pre-launch QA prototype that checks UTM parameters, URLs, redirects, and creative assets, then assigns weighted severity.
- Built with FastAPI/Python and React/TypeScript, with live progress and shareable, print-ready reports.

ACE **Sep 2025 - Present**

- Experimental, human-reviewed analytics platform using Python and React for segmentation, churn-risk indicators, and what-if KPI analysis.
